- Working as API Developer, who is responsible to design and develop E2E workflow using .Net and Azure Services.

Certification

- Azure Developer Associate (**Az 204**)
- Azure Data Fundamentals (**DP-900**)
- Microsoft Certified Trainer

Technical Skills

Frameworks	Microsoft .NET Framework 4.7, Jest, Enzyme, Xunit, .Net Core 3.1
Application Types	Cloud applications (ASP.NET core, ASP.NET core with web API)
Database	Azure Cosmos DB, PostgreSQL with Marten library.
Programming Language	C#, React Js
OS Platform	Windows 7, Windows 10
IDE/ Development Tools/Testing Tools	Visual Studio 2017, Visual studio Code, Visual Studio 2019, Azure Storage Explorer, Azure Service Bus Explorer, Postman, Swagger
Software Development Models	Waterfall Model, Agile
Version Control Software	Azure DevOps, Git
Azure Services	<ul style="list-style-type: none">• Azure Storage Account• Azure Functions• Event Hubs• Service Bus• Cosmos Db• Azure PostgreSQL• Web Jobs• API Management• Azure WebApp• App Service• Azure DevOps services.

Project Details/Experience

Project Name	KMD R&D (LoGIC)
Organization	Tech Mahindra
Client	KMD
Team Size	5
Duration	April 2018 to September 2020
Role	Software Development and Test Engineer
Project Description	The project is used to develop a platform by exposing APIs for further developments for local communes (government) in Denmark
Project Roles and Responsibilities: <ul style="list-style-type: none">• Working as full stack developer.• Majorly working on design of backend application.• Reviewing code of fellow team members for further approval.• Actively participating in daily story time with product owners and SME.• Coordinating the release pipelines, to make sure code is in production.• Developing functionalities as requirement and testing the same with automated tests.	
Project Name	iDesign
Organization	Virtusa
Client	Convergent Solutions
Team Size	3
Duration	October 2020 to April 2021
Role	Developer
Project Description	The project is used to develop designs for access control systems, which is used by security design engineers.
Project Roles and Responsibilities: <ul style="list-style-type: none">• Working as an individual contributor and supporting clients from US and UK• Contribute in developing Sheets and blocks using AutoCAD.• Integrate AutoCAD with .net for automated process workflow.• Plan and execute a modernization structure along with SME and PO to make use of azure services in existing legacy application.• Develop progressive POC using SharePoint to reduce folder operation time from 20 minutes to 3 minutes• Reviewing and approving code of peers.• Actively participating backlog refinement with product owner and planning for sprint accordingly.	

Project Name	Logic
Organization	NEC Software solutions (Formerly known as Rave Technologies)
Client	KMD
Team Size	5
Duration	April 2021 to till date
Role	Developer
Project Description	B2B model, design and develop platform so that it can be used by other developers
Project Roles and Responsibilities: <ul style="list-style-type: none"> Working as API Developer Reviewing code of fellow team members for further approval. Actively participating in daily story time with product owners and SME. Coordinating the release pipelines, to make sure code is in production. Developing functionalities as requirement and testing the same with automated tests. 	

Academic Profile

Course	Institution	Year of Passing	Marks Obtained
Bachelor of Engineering (Information Science)	AMC Engineering College	JUN 2017	70%
PUC	Vijaya Junior College	MAR 2013	77.8 %
SSLC	Canara Boys High School, Mangalore	MAR 2011	84%
